Special Programmes

The first days of the festival (1-4 October) will be targeted to specific audiences through special programs, in particular biology students, students of tourism, business and public sector related to nature tourism. We leave the invitation to all who are interested in participating in the initiatives that we are preparing to contact the event organization. You may also submit suggested programmes (topics to be addressed, activities to be undertaken, etc.) so that our proposal meets the objectives of your visit. Contact: Alexandra Lopes (SPEA), alexandra.lopes@spea.pt; (00351) 213 220 434.

In the case of touristic animation companies who want to visit Sagres, we suggest making use of our service "VIP Manager".

VIP Manager - Plan your trip to Sagres

Is available a personalized customer service "VIP Manager" directed at tour operators and individual visitors who want more information about the region, particularly in terms of accommodation, catering and other services in the municipality. It is an opportunity for stakeholders to stay aware of what the region has to offer at this level, establish partnerships for the creation of package tours, and planning visits to this destination during the festival or at other times of year.

Contacts: Ana Fernandes (CMVB), (00351) 910 547 861, gav.ana.fernandes@cm-viladobispo.pt.

Presence confirmed - Erik Hirschfeld, publisher of the book "The World's Rarest Birds"

Further to a contact made during our presence in 2011 in Falsterbo Bird Show (Sweden), this publisher has now confirmed their participation at the 3rd Festival of Sagres in which will make a presentation of the book - The World's Rarest Birds. "It will certainly be an opportunity not to miss to hear about a topic that is the agenda at a time when the IUCN prepares to make a revision to this list of birds.

The project World's Rarest began in 2010 when the United Nations proclaimed "International Year of Biodiversity." It is a non-profit initiative that aims to draw attention to the species most threats and raise funds for their conservation. In this first phase addressed particularly birds and contributed significantly to the work of BirdLife International, specifically for their Prevention Program of the extinctions. The World's Rarest Birds is the successor to the Rare Birds Yearbook edition, published in 2007 and 2008, which included the critically endangered species.
